

PRODUCT INFORMATION

This 2 crossbar ladder rack is ideal for step and extension ladders and features a handle on the curb side that rotates the ladder from the roof stowed position to the side deployed position. The street side includes a clamping mechanism operated via a handle that releases or secures ladders to the roof. The powder coated aluminum construction with padded rubber contact surfaces will keep your rack and ladders protected to ensure a long service life. Hydraulic cylinder(s) provide smooth and controlled movement of ladder with automatic clamping built-in.
